winlottosystems

by Prof. William Foster, MBA

Warning

Hello, and thank you for taking the time to download and read this report.

I want to tell you something...

What you are about to read will change the way you play your favourite lottery, forever.

This Special Report has been compiled with two express purposes:

- To expose the myriad of 'lotto system' scams on the market today; and
- To demonstrate that if you play by the universal and immutable 'laws' of lotto, it is truly possible to win **up to ten times more often** than you do now.

You *may* be confronted by what I will say. You will certainly be challenged to examine some of your pre-conceived ideas about how to win the lottery.

Either way, the facts will speak for themselves.

I will reveal more than thirteen years of rock-solid, truthful and consistent data that will shock you, and demonstrate - beyond a doubt - that you have been duped.

I pit my prize-winning strategies and winlottosystems software up against two of the most popular 'systems' used by lotto players today. In particular, I chose the convenient 'Quick-Pick' (random) entry - which is played by almost one-third of all players every week - and the sophisticated 'System' or 'Combo' entry which promises multiple prizes.

You could flick straight to the tabulated results (they start on page 9), but the results won't mean a thing unless you read and absorb the data which introduces this report.

I truly hope that what you'll learn will inspire your lotto success.

Prof. William Foster, MBA
International Lotto Systems Expert

The Universal Rules of Lotto

Imagine what it would be like to win a cash prize regularly.

Imagine being able to expect to win a cash prize every week.

What would YOU do with the extra cash each month?

When you play lotto according to the 'rules,' you truly can win lotto prizes on a regular basis. As soon as I discovered the rules to winning lotto prizes consistently and frequently, I have won a lotto prize (almost) every week.

I used to play lotto like most people. I studied the historical data of drawn numbers looking for patterns, then I tracked a set of 'hot numbers,' and I spent hundreds of dollars on a suite of lotto systems and software that all claimed to know the trick to picking the lucky numbers, etc.

After years of struggling to win even a small prize, I finally sat down and asked myself a critical question – a question I'm sure you have asked yourself many times too:

What is the minimum number of games (or tickets / coupons) I have to play to **GUARANTEE** a win?

To make a long story short, I developed a set of unique prize-winning 'systems' which I call **winlottosystems**.

Today, I win lotto prizes so frequently, my lotto agent thinks I've got the golden touch. I am often interviewed by newspapers and TV networks to publicise my good fortune and share my expertise. And, my inbox is filled with glowing testimonials from many happy customers all over the world.

I spend no more than \$80 each week (often \$40-\$60), and yet, I win a lotto prize almost every week. I don't even bother to check my tickets anymore, because, as a rule, I expect to win.

How do I do this? It's simple. I play by the rules.

The Rules

If you have read '**Win BIG By Winning Small First**' ebook, then you know the 'rules' I'm talking about.

You will also know that every lotto 'system' that claims it can predict the winning lotto numbers is a scam (there is no kinder word for these unscrupulous products).

If you haven't read this ebook, then I strongly encourage you to read it NOW before you waste any more of your hard-earned money on losing lotto tickets. Instantly download your very own copy from www.winlottofrequently.com/winbig.htm

winlottosystems software plays by the rules. These simple, cost-effective lotto systems combine your chosen numbers in a way that adheres to the three immutable, universal laws of lotto:

- ***Lottery numbers are totally random;***
- ***99.9% of all prizes are won by matching only three, four or five of the drawn numbers; and***
- ***Every single lotto game (or ticket/coupon) you play can win a prize – any prize, including the million-dollar jackpot!***

If you're sitting there saying to yourself "Yeah, I already know *this!*" then I expect that you're winning lotto prizes regularly too. But, if you're not (which is why you're reading this report, right?), then may I suggest that you haven't yet put this knowledge into practice. Otherwise, the universal laws of lotto would dictate that you too would be in the winner's circle.

As you will see from the results which follow, winlottosystems win consistently, frequently and at least four and up to ten times more often than the average lotto player.

Consequently, winlottosystems recoup a larger proportion of weekly playing costs, which means you SAVE money. And this means it's costing you less money each week to chase that 'million-dollar' dream.

So, do you think I'm more motivated to play my favourite lottery each week?

You bet I am! And the good news is, you can be too.

The Proof

We all know that winning the major 'million-dollar' prize is nigh impossible. So, there is a lot to be said for winning a consistent and regular stream of smaller cash prizes along the way. That's what my simple prize-winning strategies are all about.

I have been testing three winlottosystems - on-line and public - with a set of actual weekly drawn results since 1998. Week in, week out, that's more than 13 years of data! The Tests play \$18, \$130 and \$600 per week respectively to reflect the variety of budgets which lotto players and syndicates spend each week.

The results have been **mind-blowing**, to say the least!

When these results were first published, it embarrassed a lot of so-called 'lotto experts' (not to mention, causing quite a few of them to re-examine their closely-held beliefs!).

Any lottery in the world could have been used for this case-study. However, for purposes of ease and consistency, I have used the results of Australia's biggest and most popular 6 from 45 lottery '*Australia Lotto Bloc.*'

Given the universal and immutable laws of lotto, I guarantee that identical results and conclusions can be produced no matter which lottery I choose to conduct the Tests.

All of which means, similar results can be achieved using my strategies and winlottosystems with any 'pick-5', 'pick-6' and 'pick-7' lottery in the world – including your favorite lottery.

The results are updated every six months, and clearly show that winlottosystems work (www.winlottofrequently.com/stats.htm).

Since 1998, winlottosystems have:

- Won lotto prizes **up to 10 times more often** than standard 'Quick-Pick' (random) and 'System' Entry games; *and*
- Returned significantly more (**20 to 50%**) of what it costs to play (on average) compared to any other system.

Anecdotally, I also know from the comments of hundreds of happy winlottosystem customers, that a consistent stream of smaller cash prizes is a brilliant source of motivation to keep chasing that elusive 'million-dollar' dream.

The pages which follow reveal everything you want to know – the numbers, the systems and the extraordinary results – to show you *and prove to you* that my strategies work.

USD\$100 Money-Back Guarantee

Carefully read and study the data and results which follow. There is nothing to hide, and there are no secrets. Just the facts. Sticking to the universal rules or laws of lotto, you will quickly understand how and why my strategies win so often.

Then, if you, too, want to dramatically increase your chances of winning lotto prizes, go to:

www.winlottofrequently.com/lottomagnet.htm

and order **winlottosystems Premium** today.

I am so confident that by adopting my prize-winning strategies when you use winlottosystems, you will win back at least its purchase price within the first 8 weeks of use.

And, if not, **I'll give you USD\$100 cold, hard cash. Guaranteed!!**

This is the **ONLY REAL MONEY-BACK** guarantee in the business.

You have to ask yourself, why am I the only lotto systems developer to do this? Makes you wonder how much you can trust any other product, doesn't it?

So, you have nothing to lose, and everything to gain.

Go to www.winlottofrequently.com/lottomagnet.htm today...

** Turn to page 17 for more details.*

Test Integrity

To ensure the integrity of my test procedures, I established four rock-solid rules of engagement. They were, and continue to be:

- Test three unique winlottosystems, each reflecting a different budget. The smallest system would cost \$18 to play, while the other two cost \$130 and \$600 respectively.
- Each winlottosystem will play the exact same selections and six- or seven-number combinations in every Draw.
- The actual drawn numbers of Australia's largest 6 from 45 lottery '*Australia Lotto Bloc*' (Saturday night Draws) will be used to test all three systems.
- To provide a statistically valid dollar-for-dollar comparison, each winlottosystem will be compared with two alternative 'systems' of equivalent value, i.e., each system will play an equivalent number of games (or tickets / coupons). See below for more details.

The Tests commenced in June 1998. As of January 2012, the Tests have played the actual winning numbers of more than 710 Draws, to compile **a staggering 13+ years of data.**

To protect my proprietary rights, the specific design configurations of each winlottosystem subjected to a test is not detailed in this report. However, certain design parameters such as the number of games played and type of prize-winning guarantee is provided.

[To get the specific lotto system design configurations, click here.](#)

Alternative (Un-Profitable) Systems

I chose to use the two most popular 'systems' which lotto players throughout the world in each of the three Tests.

They are:

Random Numbers (or Quick-Picks)

A series of (computer generated) random six-number combinations covering all 45 numbers. Often referred to as a "Quick-Pick" or "easy-pick" entry, close to one-third of lotto players throughout the world use this type of system to play their favourite lottery each week;

and

'System' Entry*

A fixed system of six-number combinations which cover every three, four, five and six-number combinations for 8, 10 and 12 numbers respectively. In Australia, Canada and the UK, these systems are often referred to as 'System' or 'Combo' Entries. Although sophisticated and expensive to play, they are very popular among large groups of players and syndicates because they offer multiple prize guarantees.

The numbers and combinations used in each Test are shown for both the System Entry and winlottosystems. However, as the combinations for the Random Numbers system vary from Draw to Draw, they have not been published here.

** known by a variety of names world-wide, System (or Combo) Entries are those in which you are entitled to mark more than the standard number of selections in one game panel. For example, in Australia, Canada and the UK the national lottery accepts only six numbers in one standard game panel, whereas playing a 'System Entry' permits seven or more numbers in one game.*

Test 1 - \$18 per week

In this Test, I spend approx \$18 per week, playing exactly **28** six-number games (or tickets / coupons) with each 'system.'

Although identical in terms of the number of games played, each system 'covers' a different number of selections:

- The Random Numbers system plays every one of the **45** numbers at least three times;
- The System Entry plays only **8** of the 45 numbers; and
- The winlottosystem covers **32** of the total pool of 45 numbers, because it plays four unique sets of 8 numbers.

Dollar for dollar, each system has exactly the same chance of winning a prize, including the major six-number '1st division' or jackpot prize.

The eight numbers played in the System Entry are:

5 7 15 19 28 31 38 42

It costs the equivalent of 28 six-number games to play this system, because the System Entry is designed to automatically 'play' every six-number combination which can be formed from these eight numbers.

The four sets of eight numbers for use in the winlottosystem are:

<i>Set 1</i>	5	7	15	19	28	31	38	42
<i>Set 2</i>	2	8	14	20	27	32	39	43
<i>Set 3</i>	1	3	4	16	29	35	40	44
<i>Set 4</i>	6	10	18	23	30	37	41	45

As with all winlottosystems' Econo prize-winning guarantees, if ANY FOUR of the eight numbers (within each set) match the actual drawn numbers, the System will win a four-number prize (at a minimum), often more.

Each set of eight numbers requires 7 games of six-number combinations to give the specific prize-guarantee, which are then transferred to a total of 28 lotto game squares.

Test Results

TEST #1 RESULTS 'Australia Lotto Bloc' June 1998 to January 2012

Type of System	Annual Prize-Winning Draws (Average)	Annual Prize Dividends (Average)	Percent of Playing Costs Recouped
Random Numbers	1.1	\$138	14.1%
System Entry	0.8	\$203	21.1%
winlottosystems	3.3	\$172	18.0%

Conclusions

In terms of motivation, winlottosystems wins hands down because it won a lotto prize four times MORE often than the two system alternatives during the test period.

Although the Systems Entry recouped slightly more of its total playing costs than winlottosystems, winning less than once a year is very likely to lead to someone giving up lotto.

The choice here is a no-brainer - more money recouped than an average player would ordinarily expect (i.e. less cost), and more cash prizes to motivate you as you play.

Logically, a system that covers more of the total pool of numbers, and is designed to win the most probable prizes – that is, it adheres to the universal rules of lotto - will be more successful in the long term. Remember, **it's all about winning lotto prizes MORE frequently than you're doing *right now!***

this simple lotto secret too ...

www.winlottofrequently.com/lottomagnet.htm

Test 2 - \$130 per week

In this Test, I spend approx \$130 per week, playing approximately **200** six-number games (or tickets / coupons) with each 'system.'

Although almost identical in terms of the number of games played, each system 'covers' a different number of selections:

- The Random Numbers system plays every one of the **45** numbers at least 26 times;
- The System Entry plays only **10** of the 45 numbers; and
- The winlottosystem plays every one of the **45** numbers at least two times, because it plays ten unique sets of 10 numbers.

Dollar for dollar, each system has (almost) exactly the same chance of winning a prize, including the major six-number '1st division' prize.

The ten numbers played in the System Entry are:

2 8 10 15 20 29 32 33 41 42

It costs the equivalent of 210 six-number games to play this system, because the System Entry is designed to automatically 'play' every six-number combination which can be formed from these ten numbers.

The ten sets of ten numbers for use in the winlottosystem are:

Set 1	2	8	10	15	20	29	32	33	41	42
Set 2	4	6	14	16	24	27	31	36	40	45
Set 3	3	12	13	18	21	28	34	35	38	43
Set 4	1	7	9	11	17	19	22	23	25	30
Set 5	2	5	10	26	35	37	38	39	42	44
Set 6	3	4	12	13	15	19	39	40	43	45

Set 7	6	9	11	18	20	21	22	28	32	44
Set 8	14	16	23	24	25	27	30	33	37	41
Set 9	1	5	7	8	17	26	29	31	34	36
Set 10	3	4	20	21	22	23	24	28	39	45

As with all winlottosystems' Econo prize-winning guarantees, if ANY FOUR of the ten numbers (within each set) match the actual drawn numbers, the System will win a four-number prize (at a minimum), often more.

Each set of ten numbers requires 20 games of six-number combinations to give the specific prize-guarantee, which are then transferred to a total of 200 lotto games.

Test Results

TEST #2 RESULTS 'Australia Lotto Bloc' June 1998 to January 2012

<i>Type of System</i>	<i>Annual Prize-Winning Draws (Average)</i>	<i>Annual Prize Dividends (Average)</i>	<i>Percent of Playing Costs Recouped</i>
Random Numbers	5.8	\$1,488	18.7%
System Entry	2.0	\$1,986	27.6%
winlottosystems	23.9	\$2,229	32.5%

Conclusions

Week after week, **winlottosystems** blows the competition away!

winlottosystems compare VERY favourably because they adhere to the universal laws of lotto. That is, the winlottosystem used in this Test covers all of the total pool of numbers (45) and applies a system to combine these numbers that is designed to win the most probable prizes, namely four- and five-number prizes.

Specifically, the winlottosystems:

- Returned almost one-third of what it has cost to play during the Test period, significantly more than the System and Random Number systems;

and

- Won a lotto prize once every two weeks (on average) - substantially more motivating than the average prize-winning results of the two alternative systems.

Research indicates that the majority of lotto players spend between \$50 and \$100 per week chasing their 'million-dollar' dream. Therefore, this Test (valued at \$130) more closely reflects the possible results an average lotto player could expect.

If this sounds like you, you have to ask yourself:

***On average, do you win a lotto prize
once EVERY two weeks?***

If not, there can only be one reason why...

**Start Your Own Never-Ending Winning Streak
By Clicking This Link Today ...**

www.winlottofrequently.com/lottomagnet.htm

Test 3 - \$600 per week

In this Test, I spend approx \$600 per week, playing approximately **920** six-number games (or tickets / coupons) with each 'system.'

Although near-identical in terms of the number of games played, each system 'covers' a different number of selections:

- The Random Numbers system plays every one of the **45** numbers at least 122 times;
- The System Entry plays only **12** of the 45 numbers; and
- A single winlottosystem plays **18** of the 45 numbers.

Dollar for dollar, each system has (almost) exactly the same chance of winning a prize, including the major six-number '1st division' prize.

The twelve numbers played in the System Entry are:

2 4 10 11 21 23 25 26 28 30 39 40

It costs the equivalent of 924 six-number games to play this system, because the System Entry is designed to automatically 'play' every six-number combination which can be formed from these twelve numbers.

The 18 numbers for use in the winlottosystem are:

2 4 5 10 11 19 21 23 24
25 26 27 28 30 35 39 40 41

Unlike the two previous Tests, this winlottosystem uses a multiple prize-winning guarantee. In this case, as with all winlottosystems' multiple prize-winning guarantees, if ANY FOUR of the 18 numbers match the actual drawn numbers, the System is designed to win multiples of four-number prizes.

This winlottosystem will produce 131 sets of individual seven-number games (to give the specific prize guarantee), which plays the equivalent of 917 six-number games.

Test Results

TEST #3 RESULTS 'Australia Lotto Bloc' June 1998 to January 2012

Type of System	Annual Prize-Winning Draws (Average)	Annual Prize Dividends (Average)	Percent of Playing Costs Recouped
Random Numbers	9.7	\$6,987	15.9%
System Entry	6.0	\$9,149	28.9%
winlottosystems	18.6*	\$14,750*	46.7%*

** Figures do NOT include 1st Division (\$1.2 million prize) in Aug 2010 so as to not skew the results.*

Conclusions

The results earned by winlottosystems during this Test are consistently **OUTSTANDING**. Again, this is chiefly due to the fact that it covers as many of the total pool of numbers as possible, and uses a system designed to win the most probable prizes. Or in other words, it adheres to the golden rules of lotto.

Even without winning the \$1.2 million prize in August 2010, winlottosystems compare extremely favorably to the two alternative systems because they have:*

- Returned **ALMOST ONE-HALF** of what it has cost to play during the test period; and
- Enjoyed a prize-winning draw every 2 weeks (on average) - far more motivating than the prize winning results of either alternative.

It's clear - **winlottosystems** work!

If you play in a syndicate, or share a similarly expensive lotto entry with a large group of people, take note.

Does your syndicate or group win one or more lotto prizes EVERY month?

Be A Lotto Prize 'Magnet'

The results you have just discovered are real. To review the most recent data, go to www.winlottofrequently.com/stats.htm

These are the results I have been getting for more than 13 years now, and they can be yours too, if you want them.

Imagine stuffing wads of cash into your wallet every week...

Imagine what it would be like to have an **unfair advantage over nine out of ten other lotto players...**

I guarantee that this is the ONLY way to WIN BIG at lotto.

Here's why...

- 1. You adhere to the four critical prize-winning strategies, including the use of winlottosystems software;**
- 2. You'll start to win a regular flow of smaller cash prizes - guaranteed;**
- 3. Your motivation to keep playing will be extraordinarily high because you feel that every time you win, you're getting close; *and***
- 4. Finally, you're in with a REAL chance to win the BIG ONE.**

And isn't this last point what you're really after?

**Save Money, Win More Often & Have More Fun
By Clicking This Link Today ...**

www.winlottofrequently.com/lottomagnet.htm

Risk-Free

As I said earlier, winlottosystems come with my personal, risk-free **\$100 Cold, Hard Cash Money-Back Guarantee** if you don't recoup the cost of the software within eight weeks.

Or, if you're just not happy with winlottosystems at any time during these eight weeks, simply request a full and immediate, no-questions-asked refund.

I couldn't be fairer than that.

So, what have you got to lose?

You could continue to play lotto the old fashioned way ...

... which I have just proven to you is tantamount to throwing your money out the window!

... or, you could try my prize-winning strategies and the most proven lotto system in the world,

...and become a **WINNER**.

winlottosystems

the secret to winning BIG is winning small first
